April 17, 1991

TO WHOM IT MAY CONCERN:

This letter is our recommendation of Mr. John Bowler as a highly competent S/38-AS/400 software consultant. In 1988 Mr. Bowler took on an assignment involving what was for Stolt at the time the most sophisticated interactive decision manipulation module which supported our Ship Brokers in their entry of new cargo bookings and the matching of same to available ships. Not only did this software development exhibit Mr. Bowler's mastery of all aspects of S/38 (RPG III) interactive programming but it also demonstrated his capability to understand and mechanize extremely complex logical algorithms.

If you should like to discuss Mr. Bowler's professional capabilities, please do not hesitate to call me.

David J. Noonan  
Vice President, Information Systems

Stolt-Nielsen, shipowners for one hundred years 1891 - 1991
